

Children's Cardiac Nursing 1: Foundation 2026

Overview

Aimed at nurses who are new to working within cardiac services, and more experienced nurses working within other areas that provide care for cardiac patients but not as a speciality. This course focusses on cardiac anatomy and physiology of both the normal heart and the more common congenital cardiac lesions.

Assessment

In-class multiple choice questionnaire (MCQ) and small group-work to produce a poster/teaching board on a topic of the candidates' choice, related to the nursing care of a child with a cardiac problem. Optional assessment - course designed so that students can obtain credits through their chosen university via an APEL route (Additional cost to student).

Requirement

Commitment to attend all study days and complete self-directed study. 80% attendance is required for module completion. Attendance of Day 1 is mandatory.

Dates

January 19, 28, February 4, 9, 23, March 9

September Cohort - 16, 23, 30, October 12, 19, November 4

Please note, days run on both Monday and Wednesday, please ensure you are allocated the correct days off.

Cost

£699
