### Level 2 Paeds- Feedback from the Cardiology team

- Challenging to collate the evidence and write the reports in the required timescales
- All necessary evidence was available, except the Directorate risk register (which is in preparation at present)
- Development of the Work Plan has already informed key actions for service development
- Timing of the review probably helped in progressing the Psychology business case through the health board

### Level 2 Paeds- Initial review feedback

#### **Achievements**

- Transition care
- Nurse presence at all fetal clinics
- Guidelines book
- Evidence of seeking user feedback and acting on that feedback

#### Immediate risks

(none identified)

#### Serious concerns

• Problems with dicom storage and transfer of echo images in ABHB – leading to negative impact on the service's ability to deliver appropriate patient care

#### Areas for improvement

- Staffing levels on Pelican Ward, leading to reduced flexibility in delivering care
- Workload of the CNS team need for investment to ensure appropriate roles, skill mix and numbers to meet the current and future demands

### Level 2 Adults- Initial review feedback

#### Achievements:

- Good quality service from the available resources.
- Up to "Standards" "Phase1" clinics and Maternal Cardiology service
- Significantly improved cardiac MRI service
- Exemplary Transition service
- Phase2 business case

#### Immediate risks:

No

#### Serious concerns:

No

#### Areas for improvement:

- Integration and equity of ACHD services in South Wales is needed.
- At least one more full time ACHD consultant. More will be needed for the patient-load.
- More CNS needed
- More congenital-dedicated physiology service needed
- Psychology service needed
- Complete database/Audit tool with IT support needed
- ACHD data coordinator/manager
- More admin support needed
