Information | Children

In this section, you will find clinical information (guidelines, protocols and toolkits) relevant to Paediatric care.

The information is in alphabetical order, in two sections covering Clinical and Nursing.

If you have any suggestions for further documents to be added, please email: Sheena.Vernon@uhbristol.nhs.uk

Finalised guidelines, awaiting upload to the website

- Palivizumab & Respiratory Syncytial Virus(RSV) Prophylaxis in Paediatric Congenital Heart Disease
- Carvedilol
- Flecainide
- Captopril and ACE Inhibitor Therapy
- Warfarin (?Welsh team to use)
- Low molecular weight heparin (?Welsh team to use)

Guidelines being finalised

- Dinoprostone-guidelines being collated and network draft to be amended and circulated
- UFH/anticoagulation guideline being revised

Other guidelines???

- Previously worked on Amiodarone- but no census within Bristol
- Suggestion it may be useful to have an immunisation guideline-these frequently change
- Annual influenza information
- No other suggestions received

Any comments?
