

May 2020

Dear CHD/ACHD link nurses,

I hope you are all well

Due to the pandemic the [May lesion of the month is – Covid-19 and CHD](#) - please circulate to your wider teams.

Please find really useful information for both patients and staff surrounding advice about Covid-19 and the ACHD patient as well as resources for staff about wellbeing- there is a really useful presentation created by the Pan Thames paediatric wellbeing hub which is useful for both paediatric and adult teams.

Please also find a poster showing that all CHD patients should have their BP preformed on the right arm, this is really important for our patients as the left arm is not always accurate depending on the condition the patient has- could you please put this up in your departments and circulate with your teams.

Our department is starting to get back to 'normal' and as always we are here to help if you need anything- please do not hesitate to contact us via our normal channels.

Take care and best wishes
